

 **Flexbar... A unique concept!**

**Flexbar** ... A unique concept!

**Gamko** celebrated its 50th year in business in 2008 by bringing out a totally new, revamped product line, the **Flexbar**.

The photo on this page shows the Badpaviljoen in Domburg; an exceptional bar at an exceptional location... you will find this restaurant in the middle of the Domburg dunes.

The interior of the Badpaviljoen scooped the VENUEZ Hospitality & Style award in 2008 for "Best Interior Design".

Gamko has fitted various Flexbar installations that are connected to the central cooling system. The Flexbar on the photo here is made up of cooled glass drawers with **EQUAL-LED** and uncooled solid doors.

The Teerkamer in Bergen op Zoom has had a complete metamorphosis. The full two-floor café restaurant was given a facelift.

Gamko installed the central cooling system including all the buffets. A superb contract with an equally excellent result. The Flexbars are connected to the central lighting control system and colours automatically with the selected ambiance.

De Teerkamer

A particularly trendy bar at a top location in Amsterdam.

The back bar consists of six segments cooled by intermediate style evaporators. This means you do not lose space and at the same time have maximum cooled storage available – combined with a central cooling system. Under the bar Gamko installed a cooled door segment combined with bottle shelf and drawer. Alongside this a stand-alone freezer was chosen, from the same Flexbar range of course.

Badhu is housed in an old public bath in Utrecht and takes its inspiration from the Moroccan hammam. Arab food and drink are served in the restaurant. The hotel has eight luxury rooms, each with its own decor fully in one colour. Badhu... eating and sleeping Arab style.

Gamko has fitted various Flexbar installations in this special location, all with drawers rather than doors. The drawers in the back wall are designed with glass fronts and EQUAL-LED lighting. The refrigeration units under the bar have so-called intermediate style evaporators, because of the lack of space. These evaporators do not take up any extra space. This option means that despite the column in the bar, a maximum stock of bottles can be stored. The different bars are controlled by a central cooling system.

The cultural meeting point LUX is the home of international cinema, debate and theatre & music. Café and restaurant LUX offers you the opportunity to eat & drink, ranging from a simple cup of coffee to a full diner.

Gamko fitted various Flexbar installations in this wonderful location. In the back wall glass doors for excellent cooled product presentation, under the bar cooled and uncooled drawers, perfectly combining ease of use with maximum storage capacity.

The particularly trendy, recently totally renovated Renaissance Hotel Amsterdam has a completely new lounge bar.

Gamko fitted various Flexbar installations in this special location. The drawers in the back wall are designed with glass fronts and EQUAL-LED lighting. In the middle of the back wall there are two stand-alone freezers. The front of the bar is designed as a full cocktail bar.

  
RENAISSANCE  
AMSTERDAM HOTEL

Belgian beer café Bruxelles is a large pub with a pleasant ambiance located in the heart of Breda. Bruxelles specialises in Belgian beers (8 on tap, 25 bottled), whisky and rum.

Gamko recently renovated the entire bar here. Below the bar are closed anthracite-coloured coolers and behind the bar are glass door display coolers which draw attention to the wide range of specialty beers. These coolers have been fitted with amber-coloured EQUAL-LED lighting, which illuminates the bottles to give a perfect ambience. All coolers are connected to the central refrigeration system.

Sopranos, a unique Mediterranean restaurant right in the culinary heart of Eindhoven. Gamko was able to design the available space to the maximum by using a round Flexbar installation. Thanks to the modular system, any curve in the bar can be contained by the refrigeration. Red EQUAL-LED lighting was chosen so that the refrigeration blends perfectly into the ambiance.

Danza, tapas y mas... Tapas bar Danza in the heart of 's-Hertogenbosch brings you the atmosphere and taste of the Spanish kitchen.

A special manner of product presentation... no back bar with glass doors but a bar with glass fronts at the front. Excellent product presentation blending perfectly in style with the ambiance through the use of coloured EQUAL-LED lighting.

LUZ has an international character.

A robust industrial environment refined with white linen, beautiful leather pod chairs and light that shapes the mood.

LUZ, a restaurant with that typical club feeling. From 11 pm onwards, restaurant LUZ turns into Club LUZ.

Gamko installed a full cocktail bar here. Cooled and uncooled alternate with special segments for storage of dishwasher shelves and ice-cube makers. The cooled segments are controlled by the central cooling system.

Let Gamko help you create your own cocktail bar using the **Flexbar** system. Experiment with combinations, play with the components, try out different arrangements and add the necessary cocktail accessories until you are happy with the result. A complete cocktail bar just the way you want it.

The particularly trendy, recently totally renovated Renaissance Hotel Amsterdam has a completely new lounge bar. Gamko fitted this special location with various Flexbar installations. The cocktail bar is a marvellous combination of cooled and uncooled segments. Three speed rails and cooled bottle trays in the top of the work counter make this bar extremely functional and particularly user-friendly.

Usine has moved into the icon of Eindhoven, the light tower, the former Philips lamp factory. And as they themselves always boasted: "les plus grandes usines du monde". Usine's move has respected the space and history of the premises; a spot where residents, users and visitors to the city can meet.

Gamko fitted this special project with various Flexbars. All these Flexbar installations are connected to the central cooling system that also controls the cooling- and freezer cells. The glass doors are used to present the range of bottles cooled. Under the bar, the Flexbar is used as a keg cooler. The Flexbar stand alone coolers and freezers make the bar complete.

Hotel Goes, part of the Van der Valk concern recently started using a new bar. The bar has a few striking purple accents that Gamko blends into seamlessly with the Flexbar. This purple lighting makes the refrigeration one whole unit with the ambiance and is itself a real eye-catcher, in other words maximum pull! Two buffets on top of each other were chosen and are controlled by the central cooling system.

Emil & Samuel Restarant from Steen & Strøm Magazin in Oslo (Norway) has recently started using a new cocktail bar.  
The bar consists of a cooled section with glass drawers complete with EQUAL-LED and an uncooled section for storing dishwasher shelves and a coffee knock box drawer under the coffee machine.

Bottles & Bites is housed in a premises from the middle ages in the centre of 's-Hertogenbosch. B&B is cosy, cool, amazing and inspiring... famous for its range of water and wine, with cuisine ranging from sushi to an Italian toasty and from Greek yoghurt to mussels from Holland.

Gamko installed a special Flexbar here... the combination on the left of the photo consists of a machine unit in the middle with two cooled segments on both sides. The outermost four segments are uncooled. The use of intermediate panels makes it a piece of furniture with different temperature zones.

#### Supreme user friendliness...

The newly developed, innovative Flexbar door handle consists of two components: a robust aluminium shell provides structural solidness, a rubber inner side provides an optimal grip, even in case of moist hands.

#### CELS, central electronic locking system

The Gamko Flexbar is available with a fully integrated, central electronic locking system. You lock the bar by means of only one action: turn the key and the entire bar is locked. Simple, swift and safe. You can even shut any door or drawer afterwards when it wasn't closed yet.

#### Safety

Naturally the Flexbar is fitted with tempered safety glass.

#### Installation friendliness

The Gamko Flexbar is fitted with adjustable legs. These legs can be adjusted in height both from the outside as well as from the inside.

#### EQUAL-LED lighting

The Gamko Flexbar is fitted with LED lighting in stead of tube lights. All glass front segments come with white **EQUAL-LED** lighting as a standard.

**EQUAL-LED** lighting has several advantages compared to the traditional tube lights;

- Less energy consumption. Per doorway 2 x 3 Watts in stead off 1 x 72 Watts.
- Expanded lifespan of at least 50,000 hrs
- Low voltage inside the refrigerated compartment. 24 Volts in stead off 230 Volts.
- Reduced warmth conversion inside the compartment.
- No ultra-violet or infra-red radiation
- Confined dimensions
- Equal light output

The Flexbar is also optionally available with **coloured EQUAL-LED** lighting. With this feature you can adapt the bar to it's surrounding atmosphere. You can manually pick one tuned colour for the entire bar, choose a different colour per storage segment, choose for an automated colour sequence loop, you can adjust the brightness, select a colour alteration mode, or even connect the bar to an external light processing installation to run in sequence with an overall light plan.

#### Flexibility

Gamko's Flexbar is superbly suitable for accomplishing almost any complex arrangement of a bar. A curved bar, a pass through bar (doors on either side), it's all achievable. The total collection consists of over 140 different segments with which you can see your dream bar come true!

# Flexible

#### Supreme user friendliness...

The robust Flexbar drawers are fixed with self locking bearings and two supportive inserted brackets to avoid tumbling of bottles when opening or shutting the drawer. Additional brackets that divide the container in it's width come as an option. The maximal load weight per drawer is 75 kg (165.35 lb.)

#### Supreme user friendliness...

The Flexbar bottle compartment has been designed as a drawer. Therefore the bottle compartment can easily be exchanged with a standard drawer, even after installation of the bar. In addition the container is easily removable. The depth of the container can be adjusted to bottle size by means of a removable attached plastic insert tube.

#### Flexibility

All Gamko Flexbar storage segments are available in both standard sizes of width: 41 cm and 54 cm. This allows you to always find a suitable fitting arrangement.

# Modular

#### Look

The Gamko Flexbar is available in three different looks;

- **Anthracite...** sheeted steel with a durable coating, seamlessly bordered. Curved, finished corners and edges provide easy maintenance of all surfaces.
- **Stainless steel...** the anthracite coated steel is replaced by chrome steel (AISI 430), resulting in a stunning new look of anthracite borders on chrome steel.
- **Glass fronts...** the door fronts and drawer fronts are fitted with insulated, double, toughened safety glass. Glass front drawers are unique to the market! It allows optimal glass surface in favour of optimal presentation of the refrigerated beverage assortment.
